TROPICAL CYCLONE BULLETIN NR. 19 Typhoon GORING (SAOLA)

Issued at 11:00 AM, 28 August 2023

Valid for broadcast until the next bulletin at 5:00 PM today.

GORING CONTINUES TO WEAKEN WHILE MOVING NORTH NORTHEASTWARD OVER THE PHILIPPINE SEA

Location of Center (10:00 AM)

The center of the eye of Typhoon GORING was estimated based on all available data, including those from Baler and Daet Weather Radars, at 245 km East Northeast of Casiguran, Aurora (17.0°N, 124.3°E)

Intensity

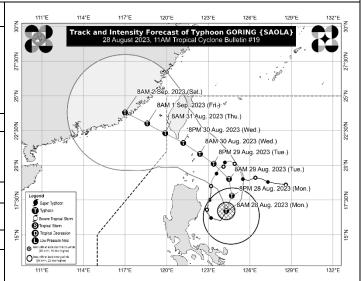

Maximum sustained winds of 155 km/h near the center, gustiness of up to 190 km/h, and central pressure of 950 hPa

Present Movement

North Northeastward at 15 km/h

Extent of Tropical Cyclone Winds

Strong to typhoon-force winds extend outwards up to 280 km from the center

TRACK AND INTENSITY FORECAST

Date and Time	Center Position			Intensity		Movement
	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	dir. and speed (km/h)
12-Hour Forecast 8:00 PM 28 August 2023	17.8	124.7	310 km East of Tuguegarao City, Cagayan	155	TY	NNE 10
24-Hour Forecast 8:00 AM 29 August 2023	19.0	124.5	320 km East of Calayan, Cagayan	155	TY	N 10
36-Hour Forecast 8:00 PM 29 August 2023	20.1	123.4	155 km East Southeast of Basco, Batanes	165	TY	NW 15
48-Hour Forecast 8:00 AM 30 August 2023	20.8	122.4	Over the coastal waters of Itbayat, Batanes	165	TY	NW 10
60-Hour Forecast 8:00 PM 30 August 2023	21.6	121.2	110 km Northwest of Itbayat, Batanes	165	TY	NW 15
72-Hour Forecast 8:00 AM 31 August 2023	22.3	119.9	260 km Northwest of Itbayat, Batanes (OUTSIDE PAR)	150	TY	WNW 15
96-Hour Forecast 8:00 AM 01 September 2023	23.0	118.6	415 km Northwest of Itbayat, Batanes (OUTSIDE PAR)	130	TY	WNW Slowly
120-Hour Forecast 8:00 AM 02 September 2023	23.8	117.0	600 km Northwest of Itbayat, Batanes or in the vicinity of Guangdong, China (OUTSIDE PAR)	120	TY	WNW 10

TROPICAL CYCLONE BULLETIN NR. 19 Typhoon GORING (SAOLA)

Issued at 11:00 AM, 28 August 2023

Valid for broadcast until the next bulletin at 5:00 PM today.

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT								
TCWS No.	Luzon	Visayas	Mindanao					
Wind threat: Strong winds	Batanes, Babuyan Islands, the northern and eastern portions of mainland Cagayan (Camalaniugan, Pamplona, Gonzaga, Santa Teresita, Baggao, Buguey, Santa Ana, Claveria, Aparri, Ballesteros, Abulug, Sanchez-Mira, Santa Praxedes, Allacapan, Lal-Lo, Lasam, Peñablanca, Iguig, Amulung, Gattaran, Alcala), the eastern portion of Isabela (Dinapigue, San Mariano, San Guillermo, Ilagan City, Tumauini, San Pablo, Cabagan, Maconacon, Divilacan, Palanan), the northern and central portions of Aurora (Casiguran, Dinalungan, Dilasag, Baler, Dipaculao, Maria Aurora, San Luis), Polillo Islands, the northern and eastern portions of Camarines Norte (Capalonga, Jose Panganiban, Paracale, Vinzons, Talisay, Daet, Mercedes) including Calaguas Islands, the northeastern portion of Camarines Sur (Siruma, Tinambac, Lagonoy, Garchitorena, Caramoan), and the northern portion of Catanduanes (Panganiban, Caramoran, Viga, Bagamanoc, Pandan) Warning lead time: 36 hours Range of wind speeds: 39 to 61 km/h (Beaufort 6 to 7) Potential impacts of winds: Minimal to minor threat to life and property	-	-					

HAZARDS AFFECTING LAND AREAS

Heavy Rainfall

Forecast accumulated rainfall for today.

• 50-100 mm: The northeastern portion of mainland Cagayan

Forecast accumulated rainfall for tomorrow

• 50-100 mm: Batanes, Babuyan Islands, and the northern portions of mainland Cagayan, Apayao, and Ilocos Norte

Forecast accumulated rainfall for Wednesday

Greater than 200 mm: Batanes100-200 mm: Babuyan Islands

• 50-100 mm: The northern portions of mainland Cagayan, Apayao, and Ilocos Norte

Forecast rainfall are generally higher in elevated or mountainous areas. Under these conditions, flooding and raininduced landslides are still expected especially in areas that are highly or very highly susceptible to these hazards as identified in hazard maps and in localities that experienced considerable amounts of rainfall for the past several days.

The Southwest Monsoon enhanced by GORING will bring occasional or monsoon rains over the western portions of Central Luzon, Southern Luzon, and Visayas over the next three days. For more information, refer to **Weather Advisory #8 for Southwest Monsoon** issued at 11:00 AM today and **24-Hour Public Weather Forecast and Outlook** at 4:00 AM today.

MMSS-04 Rev. 0 / 08-15-2023

TROPICAL CYCLONE BULLETIN NR. 19 Typhoon GORING (SAOLA)

Issued at 11:00 AM, 28 August 2023 Valid for broadcast until the next bulletin at 5:00 PM today.

HAZARDS AFFECTING LAND AREAS

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

Minimal to minor impacts from strong winds are also possible within any of the areas under Wind Signal No. 1.

Due to the increased wind radii in the southern half of the typhoon circulation, Wind Signal No.1 has been hoisted for some areas in Bicol Region. Higher wind signals may still be hoisted over Extreme Northern Luzon and the northern or northeastern portion of mainland Cagayan later today or tomorrow. Hoisting of Wind Signal No. 3 or 4 over the Batanes-Babuyan Islands area is not ruled out.

The enhanced Southwest Monsoon will continue to bring **gusty conditions** over the following areas not under any Wind Signal, especially in coastal and upland/mountainous areas exposed to winds:

- Today: Aurora, Bataan, Metro Manila, CALABARZON, MIMAROPA, Bicol Region, Visayas, Dinagat Islands, Camiguin, and most of Zamboanga Peninsula.
- Tomorrow: Aurora, Bataan, Bulacan, Metro Manila, CALABARZON, MIMAROPA, Bicol Region, Visayas, Dinagat Islands, Camiguin, and most of Zamboanga Peninsula.
- Wednesday: Aurora, Bataan, Zambales, Pampanga, Bulacan, Metro Manila, CALABARZON, MIMAROPA, Bicol Region, and most of Visayas.

HAZARDS AFFECTING COASTAL WATERS

A **Gale Warning is in effect** for the northern and eastern seaboards of Northern Luzon, the eastern seaboards of Central Luzon, the seaboards of Southern Luzon, and the seaboards of Visayas. Disruption in civilian maritime activities is expected over these areas (e.g., suspension of sea travel) due to hazardous sea condition. For more information, refer to **Gale Warning #7 (Intermediate)** issued at 11:00 AM today.

TRACK AND INTENSITY OUTLOOK

- GORING is forecast to turn generally northeastward and northward today until tomorrow, then generally
 northwestward tomorrow towards the Bashi Channel and the vicinity of Batanes. On the forecast track, the typhoon
 will make a close approach (a landfall scenario is not ruled out) to Batanes between Wednesday morning and
 evening and to the southern portion of Taiwan between Wednesday evening and Thursday morning. Afterwards, it
 will exit the Philippine Area of Responsibility (PAR) on Thursday morning or afternoon and cross the Taiwan Strait
 before making landfall over southeastern China on Friday evening or on Saturday early morning.
- GORING is forecast to maintain its strength or may slightly weaken further in the next 12 hours due to upwelling of cooler ocean waters and onset of dry air intrusion before re-intensifying as it turns northwestward. GORING may pass close to Batanes at or near its peak intensity. Interaction with the rugged terrain of Taiwan during its close approach will result to a weakening trend beginning on late Wednesday.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.

The next tropical cyclone bulletin will be issued at 5:00 PM today.
